

OSTYLE

WINTER COLLECTION 2019 / 20
SKI AND TEAM OUTERWEAR

Dear customers,

We are introducing you the new O'STYLE winter collection for the teams and multi-member groups consisting of winter and softshell sportswear for the ski racers, ski schools, sports centers staff as well as for the athletes who make use of the functional winter sportswear.

The O'STYLE sportswear has been supplied to Czech and foreign customers for many years and our continuous effort is to meet all their requirements. We offer sportswear in children and adults size lines, special rates on higher amount orders, individual service, adjustments of the cuts together with the application and print of the logos.

To see our complete collection we invite you to visit our website www.ostyle.cz, where you can find thermowear, second layers, fitness apparel, sports accessories and streetwear collection. Further, as the official sales representative we offer ski racing suits of the Slovenian brand Dr. Bobo which meet the FIS standards.

MATERIALS

DERMIZAX

- 100 % polyamide
- water column 20 000 mm/H₂O
- breathability 20 000 g/m²/24 h
- the upper layer material with the revolutionary membrane, made for the extreme conditions
- highly waterproof and windproof, breathable, abrasion resistant
- DWR 80/20 TECHNOLOGY
- woven mechanical stretch TECHNOLOGY

ERICTEX

- 100 % polyester
- water column 20 000 mm/H₂O
- breathability 20 000 g/m²/24 h
- the upper material with the revolutionary membrane, made for the extreme conditions
- highly waterproof and windproof, breathable, abrasion resistant
- DWR
- woven mechanical stretch TECHNOLOGY

SOFTSHELL 6N

- upper layer: 92 % polyester, 8 % elastane; inner layer: 100 % polyester microfleece
- membrane
- water column 14 000 mm/H₂O
- windproofness 8 000 g/m²/24 h
- the upper layer material made for the perfect freedom of movement
- waterproof, windproof, breathable, abrasion resistant
- DWR 80/20 TECHNOLOGY

TECHNOLOGIES

DWR

- special coating applied on the fabric to improve its waterproofness

The woven mechanical stretch

- innovative weaving technology of the fabric which ensures the stretchability and maintains the functionality of the material without the addition of the elastane
- while the material is weaved the connected loops are created and allow the material to stretch during the movement

INSULATIONS

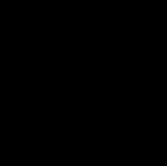

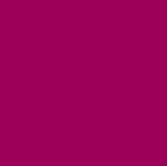

Thermore EVOdown

- 100 % polyester
- the innovative technology insulation
- ideal alternative to down feathers and free fibers
- high lofting with the luxurious hand feel
- offers the consistent thermal coverage over the entire garment
- consists of rolled free-fiber composite and reduces the migration of the fibers on the top of the garment
- environment friendly: approved by PETA organization
- easy to care – machine wash and tumble dry safe

Thermore Classic

- 100 % polyester
- the innovative insulation made by the special reduction technology
- high lofting with the luxurious hand feel
- offers the consistent thermal coverage over the entire garment
- consists of rolled free-fiber composite and reduces the migration of the fibers on the top of the garment
- 3 thicknesses of the insulation: High Loft (HL) – Compact (C) – Super Compact (SC)
- the best suitable type of the insulation may be chosen for each product
- environment friendly: contains 50 % recycled fibers from PET bottles / every jacket insulated with Classic allows recycling of up to 5 PET bottles / meets the *Global Recycle Standard* requirements
- easy to care – machine wash safe
